

# SPECIAL PRODUCTS AND PIPE SPOOLS

IMG International manufactures prefabricated components like pipe spools, which are built on assembled pipes, flanges and fittings. These assembled spools are delivered pre-mounted to the construction area.

Products can be supplied according to standard norms ASTM, ASME, EN, PED, DNV, NACE, Norsok and offered in the following materials: Titanium, Nickel Alloys, Duplex, Superduplex, 904L, and 254 SMO, Austenitic and Superaustenitic stainless steels.

Mainly applied methods: EFW, PAW, GMAW, GTAW, SAW according to our welding procedures (WPS).

# SELF-REINFORNCED NOZZLES AND SPECIAL PIPE BRANCHES

Nozzles are frequently used to control the rate of flow, speed, direction, mass, shape, and/or the pressure of the stream that emerges from them. In nozzle velocity of fluid increases on the expense of its pressure energy.

We can furnish self reinforced nozzles with plain end as well as with complex profiling in fully machined condition for Pressure Vessels designed to ANSI, ASME codes in all steel grades.

Nozzles, hollow forgings and self reinforced nozzles are offered, in carbon steel, alloy steel, stainless steel and duplex steel.

Hot forged reinforced pipe branches up to 24" according to manufacturer standard, client DRW & design conditions supplied, cod. ASME B 31.1 / ASME B 31.3 / ASME B 31.8 / DRW & calculation available. All material grades.
